Francisco Ferreira		Not yet set ⁽¹⁾	Table Navigation
Affected Version		Fix Version	Project
10.2.0.1134 ⁽²⁾		Not yet set ⁽¹⁾	Buggy Cars Rating

Environment/Platform

Browsers: Chrome 90.0.4430.212, Firefox 87.0, Edge 90.0.818.56
OS: Windows 10 Enterprise x64 version 1909

Description

Users can access invalid table pages beyond the upper limit via next page button and page number textbox. They will also be led to invalid pages when clicking the next button after having browsed to valid pages via number textbox.

Moreover, the number textbox does not work for pages 1 and 5. Typing in those pages and pressing Enter does not update the page currently displayed.

Note: The back button works as intended and pages 2, 3, and 4 can be reached via number textbox.

Observed Behavior

- Clicking the next button leads users to invalid pages if:
 - the current page is the last valid page.
 - the current page was reached through the textbox.
- Typing a number higher than the table page count into the textbox and pressing Enter leads users to invalid pages.
- Typing 1 or 5 into the textbox and pressing Enter has no effect on the currently displayed table page.

Expected Behavior

- If the next button is clicked and the current page is:
 - the last page, then clicking has no effect.
 - not last page, then clicking leads to next valid page.
- Typing a number higher than the table page count leads users to the last valid page, as in Make pages tables.
- Typing 1 or 5 into the textbox and pressing Enter leads users to page 1 or 5, respectively.

Reproduction Steps

1. Navigate to <https://buggy.justtestit.org>
2. Click the Overall Rating image on the website's main page
3. While on the first table page, click the back button
4. Note you still remain on the first table page
5. Click the next button until you reach the last page
6. Note browsing is flawless so far
7. While on the last page table page, click the next button
8. Note an invalid/blank table page is displayed
9. Type 3 in the page number box and press Enter
10. Note table page 3 is displayed as expected
11. Click the next button to reach page 4
12. Note page 31 (invalid) is displayed instead
13. Type 3 in the number box and press Enter
14. Note page 3 is displayed as expected
15. Click the back button to reach page 2
16. Note page 2 is displayed as expected
17. Type 30 in the number box and press Enter
18. Note page 30 (invalid) is displayed

Notes:

- (1) Priority, Assignee, Fix Version, and Story Points are usually set at later stages of the bug lifecycle.
- (2) Version of the platform under test I came up with since I could not find the real one in the site.
- (3) These GIFs would be added to the bug tracking application to help with issue reproduction. In this case I have added them to the shared repository for reference.
