

BUG REPORT 2

Bug ID **Summary**
BCR-002 Logout cannot be performed from Overall Rating page

Type Bug	Status Open	Resolution Unresolved	Creation Date 09/May/2021 1:05 PM
Severity [S2] Critical		Priority Not yet set ⁽¹⁾	Story Points Not yet set ⁽¹⁾
Reporter Francisco Ferreira		Assignee Not yet set ⁽¹⁾	Functional Area Login & Logout
Affected Version 10.2.0.1134 ⁽²⁾		Fix Version Not yet set ⁽¹⁾	Project Buggy Cars Rating

Environment/Platform

Browsers: Chrome 90.0.4430.212, Firefox 87.0, Edge 90.0.818.56
OS: Windows 10 Enterprise x64 version 1909

Description

Logout cannot be performed by users on the Overall Rating page. The logout button is visible and it seems enable to users but is otherwise non-functional.

This could result in a security breach, for users may not realize they are still logged in upon leaving the website, thus leaving their personal information available to third parties accessing the website via the same computer and browser.

Note: Logout works as intended from other pages on the website.

Observed Behavior

- Clicking the Logout button on Overall Rating page does not log users out of the platform.

Expected Behavior

- Clicking the Logout button on Overall Rating page logs the users out of the platform, as it does in other pages.

Reproduction Steps

1. Navigate to <https://buggy.justtestit.org>

2. Perform login using known credentials
3. Click the Overall Rating image on the website's main page
4. Click the Logout button on the page's header
5. Note you are still logged in and your Profile is accessible

Notes:

- (1) Priority, Assignee, Fix Version, and Story Points are usually set at later stages of the bug lifecycle.
- (2) Version of the platform under test I came up with since I could not find the real one in the site.
- (3) These GIFs would be added to the bug tracking application to help with issue reproduction. In this case I have added them to the shared repository for reference.
